

Director/Manager - Biomolecular NMR Core Lab, University of Michigan

The University of Michigan is reopening a search for a full-time **Director/Staff** for our newly established **Biomolecular NMR Core Lab**. The position is described in more detail in the link to the job posting below, but we seek a research-oriented scientist to oversee two high-field instruments (a brand new Bruker 800 MHz and an existing Varian 600 MHz) and two lower field instruments and to collaborate with, train, and support diverse NMR users across the University of Michigan campus and the region. This position requires productive biomolecular NMR experience and excellent communication skills.
