

## Post Doc Characterization of Protein Complexes at University of Texas Medical Branch

A postdoctoral position is immediately available for structural and biophysical characterization of protein complexes using solution NMR, SPR, ITC and related techniques. Preferred candidates should be motivated with excellent organizational and communication skills, good work ethic, prior experience in solution NMR and/or biophysics and in protein chemistry. A Ph.D. degree or equivalent is required. Salary commensurate with experience. The University of Texas Medical Branch, located in Galveston, which is 40 miles south of Houston, is a tropical island with all the charm of a southern town. The candidate will have access to excellent facilities including an NMR core of three high-field (600, 750, and 800 MHz) instruments with cryoprobes, a Biophysics core, and crystallography and cryoEM facilities. Please send a CV and names of three referees to Dr. Krishna Rajarathnam via email: [krrojara@utmb.edu](mailto:krrojara@utmb.edu). University of Texas Medical Branch is an Affirmative Action/Equal Opportunity employer committed to diversity.
